# Results Frameworks

Results Frameworks

- Maps linkages between program activities and their intended outcomes as they relate to the overall goal
- Assists in designing effective programs and measuring results

Results Frameworks

- **Goal:** Is at the top and is the highest level desired outcomes of a set of projects
- **Purpose:** The key result (outcome) to be achieved by the project and the rational for the project
- **Outputs:** Tangible, immediate and intended products or consequences of a project
- **Inputs:** Tasks, processes and resources that the project is expected to undertake or consume in order to produce outputs. Examples: technical assistance, training, commodities or equipment

Feed the Future Goal: Sustainably Reduce Global Poverty and Hunger

Indicators: *Prevalence of poverty & Prevalence of underweight children*

**First Level Objective:
Inclusive agriculture sector growth**

Indicators: -Agriculture sector GDP
- Women's and men's incomes in rural households

**First Level Objective:
Improved nutritional status esp. of women & children**

Indicators: -Prevalence of stunted children
-Prevalence of wasted children
-Prevalence of underweight women

Second-Level Objectives

Second-Level Objective Indicators

Improved agriculture productivity	Improved markets	Increased private investment in agriculture and nutrition-related activities	Increased agricultural value chain on- and off-farm jobs	Increased resilience of vulnerable communities and households	Improved access to diverse and quality foods	Improved nutrition-related behaviors	Improved use of maternal and child health and nutrition services
-Gross margins per unit of land or animal of selected product	-Percent change in value of intra-regional exports of targeted commodities - Value of incremental sales (farm-/firm level)	-Value of new private investment in agriculture sector or value chain	-Jobs created by investment in agricultural value chains	-Household Hunger Scale	-Dietary diversity for women and children	-Exclusive breastfeeding under six months	-Prevalence of maternal anemia

Programs and policies to support agriculture sector growth

Programs and policies to increase access to markets and facilitate trade

Programs and policies to reduce inequities

Programs and policies to support positive gains in nutrition

Jordan Results Framework

RESULTS FRAMEWORK FOR WATER AND LIVELIHOODS BENCHMARK COMMUNITIES IN JORDAN

IMPLEMENTING PARTNERS

WLI = Water and Livelihoods Initiative (by ICARDA)
NCARE = National Center for Agricultural Research and Extension
Univ. = Jordanian and U.S. Universities

UJ = University of Jordan
NGO = Jordanian and International Non-Governmental Organizations
Co-Ops = Badia community women's cooperatives
MOA = Ministry of Agriculture
MWI = Ministry of Water and Irrigation
MOH = Ministry of Health
IFPRI = International Food Policy Research Institute
IWMI = International Water Management Institute

KEY

- Activity/Objective
- Implementers
- Indicator
- New Indicator

Improve Livelihoods of Households in the Badia Benchmark Communities
WLI

Grow the Agricultural Sector
WLI

Improve Community Health and Nutrition
MOH, Co-Ops

Improve Ag Productivity
WLI, NCARE, Univ.

Expand Markets and Trade
WLI, Co-Ops

Increase Employment
WLI, Co-Ops

Access to Quality Food & Water
MOH, Co-Ops

Improved Nutritional Behavior
MOH, Co-Ops, IFPRI

Increased Use of Health Services
MOH, Co-Ops

Develop Water and Land Use Technology
WLI, NCARE, IWMI

Train WLI Tech Teams
WLI, Univ.

Provide Extension Services
WLI, NCARE, NGO, Private

Evaluate & Recommend Policy (BM Site Level)
WLI, NCARE, IFPRI

Develop Co-Ops
WLI, Co-Ops

Gain Access to Credit, Land and Inputs
Co-Ops

Improve Value Chain & Market Access
WLI, Co-Ops

Develop New Income-Gen Activities
WLI

Train Youth
WLI, Co-Ops, NGO, Univ.

Train Women
WLI, Co-Ops, NGOs

Working to include more activities in these areas.
